

E-Z-DISK™ (Barium Sulfate Tablets) 700 mg

Indication

E-Z-DISK™ (Barium Sulfate Tablets) 700 mg is for use in radiography of the esophagus, for detection of esophageal strictures.

IMPORTANT SAFETY INFORMATION

Contraindications

- E-Z-DISK is contraindicated in patients with known gastric or intestinal perforation or hypersensitivity to barium sulfate formulations.

Warnings and Precautions

Hypersensitivity Reactions

Severe allergic reactions of an anaphylactic nature have been reported following administration of barium sulfate contrast agents. A history of bronchial asthma, atopy, as evidenced by hay fever and eczema, or a previous reaction to a contrast agent may increase the risk for hypersensitivity reactions. Emergency equipment and trained personnel should be immediately available for treatment of a hypersensitivity reaction. Use with caution in patients with complete or nearly complete esophageal or gastric obstruction.

ADVERSE REACTIONS

Adverse reactions such as nausea, vomiting, diarrhea, and abdominal cramping accompanying the use of barium sulfate suspensions are infrequent, usually mild, and generally do not occur with this product. Procedural complications are rare, but may include aspiration pneumonitis, granuloma formation, intravasation, embolization and peritonitis following intestinal perforation, vasovagal and syncopal episodes, and fatalities.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
