Foyer E, ACV Level 0

## CT/MRI Contrast Management: **Best Practices for Vulnerable and High-Risk Patients**

Moderator: Domenico Albano

### Faculty

Domenico Albano

Radiologist at Galeazzi-Sant'Ambrogio Hospital and Niguarda Hospital in Milan

Antonella Filippone

Global Head of Medical Affairs & Scientific Information at Bracco imaging

### General description

Educational **interactive event** aims to provide a thorough guide for radiologists on the appropriate use of iodinated and gadolinium-based contrast agents, particularly focusing on specific patient populations such as those with renal impairment, breastfeeding women, pediatric patients, the elderly, and other vulnerable groups.

### Learning objectives

This educational event aims to provide a thorough guide for radiologists on the appropriate use of iodinated and gadolinium-based contrast agents, particularly focusing on specific patient populations such as those with renal impairment, breastfeeding women, pediatric patients, the elderly, and other vulnerable groups.

Facilitated by a young radiologist alongside a representative from a pharmaceutical company specializing in contrast agents, the primary objective is to deliver clear and accurate information regarding the use of these products. The content will align with the approved European product summaries and adhere to the guidelines established by the European Society of Radiology concerning contrast agent usage.

The event seeks to empower radiologists with the knowledge necessary to make informed decisions regarding contrast agent administration in sensitive patient populations. This revision enhances the structure and professionalism of the statement while maintaining all essential details.
